Meet Dr. Mike Williams

Hello Foothill Families,
I am VERY excited to be returning home and becoming a Knight again! I was very fortunate to grow up in this progressive community that carries a lot of pride to be the best. I am thrilled to have an opportunity to give back to the school that set me on the path to achieve many of my goals and dreams.

I am looking forward to understanding and building on the wonderful traditions that Foothill is known for and all the recent accomplishments. I am an innovator and risk taker by nature, and love to see others try new things especially as technology allows for all of us to be as creative as possible. Teachers today are very creative, innovative, and tech savvy. They are constantly looking to promote more and more authentic opportunities for students to shine. I enjoy the whole learning process and seeing students develop strong analytical and literacy skills. In the upcoming years, we want to continue to strive to be a model school that provides an environment where our students love to learn, grow, and reach their full potential. I believe:

· Students need a challenging academic environment, with varied levels of support in order to succeed.
· Students should get involved in the multiple extracurricular activities we offer, which play an important role in connecting them to their school.
· Students work best in an orderly and structured environment, and we want to make sure we support a productive and positive learning environment.

This community has wonderful passion and loves this school. Communication and transparency will be a hallmark of our team. We want to hold open dialogues with the staff, the students, and the community to ensure we are supporting each other and going in the same direction. We look for equitable opportunities to ensure all students will thrive under our strong plan to help all students to not only meet, but to exceed educational standards.

Foothill is a school that many look to as a leader in education, and I am excited to be part of the team that represents this outstanding community!
Looking forward to a Terrific Year!

Dr. Mike Williams
