

AP Chemistry

Dear AP Chemistry Students,

I hope you and your families are safe and healthy. Congratulations on completing the 2020-21 school year with all its twists and turns. I am excited to work with all of you next year in AP Chemistry.

As you probably already know, AP Chemistry is a very challenging course with an equally challenging AP test. The material is detailed and we have several topics to cover. In Google Classroom, I will post suggested resources for you to explore to refresh your memory on concepts that were taught in prior chemistry classes or gain a background for those of you new to chemistry. When we meet again in the fall, we will work to expand on your knowledge base. Use Google Classroom to access resources. These assignments are optional and I will not be grading these assignments. There are plenty of assignments to grade in AP Chemistry during the regular school year. Please pick and choose the resources that you feel will benefit you the most based on your comfort level with chemistry.

- Please enroll in the Google Classroom for AP Chemistry Summer Prep 2021 using the code: [qrmstvd](#)

Please email me at civory@tustin.k12.ca.us if you have any questions.

Have a great summer! :-)

Mrs. Ivory
