

Dear Community:

It is an honor to serve as Superintendent of the Tustin Unified School District. **Every day students are nurtured and challenged to prepare for a successful future.** Our goal is that all students thrive now and in the future.

Tustin Unified and the community have always made facilities planning a priority, and we still have significant facilities needs:

- ▶ Most schools in Tustin are over 50 years old.
- ▶ Many permanent classrooms have never been renovated.
- ▶ Campuses require utility upgrades including electricity, water, gas, and sewer.
- ▶ School safety upgrades are needed.
- ▶ Assembly areas are insufficient for current enrollments.

I am proud that Tustin Unified is taking the initiative to actively address these challenges. Last year the District embarked on updating its Long-Range Facilities Master Plan with over 600 participants.

We are now sharing our process and needs with the community to gather further input. We are working diligently to engage with the community to share the significant needs for modernized classroom buildings that ensure high quality outcomes for all students. Great schools protect our investment, improve our quality of life, and protect property values.

Now we need to hear from you. What do YOU think? What are YOUR questions?

Sincerely,

Gregory A. Franklin, Ed.D.
Superintendent, Tustin Unified School District

 **Survey:**

What do YOU think? Take our online survey at:

Our Needs:

RUSTY PLUMBING

AGING FACILITIES

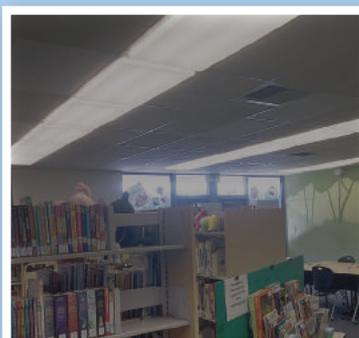

DRY ROT

CEILING WATER DAMAGE

OUTDATED SAFETY SYSTEMS

INEFFICIENT LIGHTING

AGING COMMUNICATIONS

RUSTY ROOF

- ▶ **REPAIR/UPGRADE** aging classrooms, deteriorating roofs, plumbing, sewer, and electrical systems, remove asbestos and lead paint.
- ▶ **PROVIDE** modern science and engineering labs and career tech education facilities to prepare students for college, good paying jobs, and in-demand careers.
- ▶ **UPGRADE** older schools so they meet the same academic and safety standards as newer schools.
- ▶ **PROVIDE** classrooms, facilities, and equipment needed to support high quality instruction in science, technology, engineering, and math.
- ▶ **IMPROVE** student safety and campus security systems including fencing, doors, cameras, emergency communication systems, smoke detectors, fire alarms, and sprinklers.
- ▶ **REPLACE** inefficient heating, cooling, lighting, and water systems to save money that can be spent in classrooms educating students.
- ▶ **PROVIDE** classrooms, facilities, and equipment needed to support high quality instruction in music, visual, and performing arts.
- ▶ **CREATE** flexible, multi-use classrooms to support hands-on science instruction and learning-by-doing.
